Adarsh Dwivedi

Product Manager

+91-9305597756 | 23ucs509@lnmiit.ac.in | linkedin.com/in/adarshdwivedi30 | github.com/adarshcod30

Final-year CS engineer who has shipped products end to end across 10+ national hackathons and datathons, and led a 150+ member society. Starts from a stated problem and a measurable acceptance target rather than a feature list. At Deloitte, scoped a production migration on a live SAP workflow so no consumer needed changes, with field-by-field identical output as its acceptance test. Builds for farmers, commuters and police analysts, and publishes the uncomfortable number beside the headline.

EXPERIENCE

Deloitte India, Digital Excellence Centre **Jun 2026 - Aug 2026**

AI Engineer (Agentic AI) Intern Gurugram, India

Evaluated three deployment routes against Deloitte's constraints and recommended Aegra: the commercial platform would move agent state outside the firm and an in-house runtime would rebuild a mature tool, while Aegra is open source on FastAPI and PostgreSQL.

Proved the new path on the live SAP tenant: a Bank Accounting goal was planned into 8 configuration tasks, executed in a real browser through Playwright MCP, recovered from a duplicate-entry conflict and a mis-filled field, and finished 8 of 8 in about 15 minutes.

Scoped the migration so every consumer kept working: the public API, business logic and front end stayed unchanged, and a single setting switches back to the original execution path with no redeployment.

Suganda Skincare, Growth Analysis (Contract) **Sep 2026 - Oct 2026**

Data and Growth Analyst, Freelance Remote

A D2C skincare brand had shrunk 44% from its COVID peak and had no advertising budget, so the usual growth lever was off the table. Reframed revenue as customers x orders per customer x order value, which showed customer count explains 89% of the fall and that frequency and order value, the two levers that cost nothing, had never been worked.

Found the catalogue had split in two: commodity single-active serums fell 84.9% from 2021 to 2025 while the rest grew 77.1%, and a 43.6% re-buy rate and a 22.8% median price premium showed neither product quality nor price alone explained it.

PROJECTS

Kadi, Crime Analytics Platform for the Karnataka State Police *(KSP Datathon 2026)* | **Live** | **GitHub** Zoho Catalyst, React, Graph

The Karnataka State Crime Records Bureau stated that fragmented station-level data blocked state-wide analysis. Scoped one product where a station sees its own slice and the bureau reads the whole state off the same graph.

Shipped end to end over 50 days on Zoho Catalyst: command dashboard, case-linkage graph, offender watchlist, drillable map and a bilingual assistant, reaching Level 2 as a finalist in the datathon.

KrishiMitra, Crop Intelligence Platform for Indian Smallholders *(Deployed, 12 Indian languages)* | **Live** | **GitHub** CatBoost, FastAPI, Next.js

Built each module around a question a farmer actually asks: what to sow, what is wrong with this leaf, when to water, how much urea. Shipped 13 modules in 12 Indian languages, free to use.

Refused any crop with no district precedent by cross-checking five years of government returns, because a confident wrong sowing recommendation costs a season.

Orbweaver, Fraud Ring Detection in Transaction Graphs | **Live** | **GitHub** Graph Analytics, Knapsack

Promotion abuse is a group behaviour, so a queue built on per-account scores misses the ring. Reframed the output from flagged accounts to ranked rings, reaching 0.7292 precision against a 0.2242 base rate.

Sized the queue to the team that works it with an exact knapsack over reviewer minutes, rather than flagging everything and calling it recall.

Floodcast Gurugram, Route-Level Urban Flood Risk | **Live** | **GitHub** TypeScript, Live Rainfall Data

Answered the one question a commuter actually asks, will my route flood and when, instead of a city-wide alert they still have to interpret themselves.

TECHNICAL SKILLS

Product: Product Strategy, Product Discovery, Problem Framing, PRD and Technical Specification, Roadmapping, Prioritisation (RICE), User Research, Metrics and KPI Definition, Adoption and Engagement, A/B Testing, Stakeholder Management, Competitive Analysis, Agile and Scrum, Go-to-Market

Data and Analytics: SQL, Pandas, NumPy, DuckDB, Statistical Testing, Experiment Design, H3 Geospatial Indexing, Graph Analytics, Power BI, Excel, Data Visualisation

AI and ML: LangGraph, LangChain, RAG, Prompt Engineering, Vector Search, Embeddings, Evaluation and Calibration, Amazon Bedrock, Gemini, OpenAI, Groq, Ollama

Technical Fluency: FastAPI, Pydantic, Node.js, Express, REST APIs, PostgreSQL, MongoDB, DuckDB, Redis, Zod Schema Validation

Core Computer Science: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

ACHIEVEMENTS

Competed in 10+ national hackathons and datathons: KSP Datathon 2026 finalist, Level 2 with Kadi for the Karnataka State Police; AWS AI for Bharat finalist with VaidyaMitra; Hacksplosion 2026 with Deloitte India, clearing Levels 1, 2 and 3; and SWITCH Energy-X, 11th of 93.

HackerRank Orchestrate: ranked #12 with a silver medal, top 1% (Sep 2026), up from #290 with a bronze medal, top 15% (Aug 2026), in 24-hour agentic AI challenges.

micro1 Frontier Engineering Challenge 2026: built a research-artifact verifier measured across 742 repositories.

EDUCATION

The LNM Institute of Information Technology, Jaipur **2023 - 2027**

B.Tech, Computer Science and Engineering CGPA: 7.11 / 10

LEADERSHIP

Coordinator, Debate Society, LNMIIT Jaipur (May 2025 - Apr 2026): led a 150+ member society across debates, discussions and inter-college competitions.

Secretariat and Organizer, LNMIIT Model United Nations (Aug 2025 - Jan 2026): organised a large-scale MUN conference, coordinating delegates, committees, schedules and logistics.
